

## **CLIOMETRICS OF HIGHER EDUCATION AND CONVERGENCE IN FRANCE: 1964-2000**

Valérie CANALS<sup>1</sup>, Claude DIEBOLT<sup>2</sup> and Magali JAOU<sup>3</sup>

Abstract: One of the main themes covered over the past decade in the macroeconomic literature is that of the convergence of regional or national economies. This research approach is applied to the evolution of the weight of French higher education in the total numbers of school enrolment during the period 1964-2000. How is higher education distributed in France? How has this distribution evolved? Is there a process of convergence between the French regions?

*JEL* Indexation: C12, I21, N14, O15, O18, R13.

*Key-words* : higher education, convergence, regional disparities, France.
